Engagement, Evaluation, & Assets
We are interested in understanding the rationale behind your work. These questions will ask specific details about the activities funded by this grant and how your work connects to the community impact you hope to see.

COMMUNITY ENGAGEMENT*
Please describe how you are engaging the people most impacted by your program/organization as partners or co-creators in the work. Can you cite an example of a time you changed course based on this community engagement?
Community engagement can range from survey and focus group feedback to community members acting as co-creators and strategists in the design of a project. We look to see those most impacted by the work engaged as closely as possible. It is one thing to collect information. It is something else to change course based on an analysis of what has been collected and what the community says it needs.

**IMPACT***

What would success and/or progress look like over the next 12 months? How will you measure, evaluate, and then refine your work?

What specific, quantifiable benchmarks do you hope to reach and what indicators will let you know that you have reached them? What kind of long-term changes do you expect to see if this work continues? Will your work impact the broader community?

**CAPACITY & PARTNERS***

Please describe why your organization is particularly well-positioned to do this work and carry out these goals at this time. Also describe any partners and their role in helping to achieve these goals.

Consider feasibility factors such as: time, costs, organizational capacity, ethics, your relationship and reputation with the population you will engage, any groundwork that has already been laid, etc
